

# Note on Battery Cover type

Thank you for purchasing The FLASHMATE L-308X. There are two types of battery covers for this product. When replacing or purchasing a battery cover, please ensure that you use the battery cover compatible with your L-308X.

Please follow the instructions below to check the battery cover type for your L-308X.

## 1. Check the “N” mark on the back of the meter

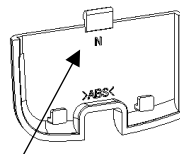

Check the inside of the back of the meter (with the battery cover removed) if there is the “N” mark.

The back of the meter (with the battery cover removed)

## 2. Types of compatible battery covers

- If there is a “N” mark on the back of the meter, please purchase the battery cover with the “N” mark.

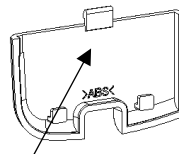

“N” mark

| JAN code of the battery cover<br>(with “N” mark) | Parts number |
|--|--------------|
| 4962294015053                                    | JE6012031    |

※Serial No. of L-308X: JE6x-2xxxxx  
(x represents a digit)

- If there is no “N” mark on the back of the meter, please purchase the battery cover without “N” mark.

No “N” mark

| JAN code of the battery cover<br>(without “N” mark) | Parts number |
|---|--------------|
| 4962294014988                                       | JE6012030    |

※Serial No. of L-308X: JE6x-0xxxx  
Or JE6x-1xxxxx (x represents a digit)

## 3. Precautions

- When purchasing a battery cover, please check the “types of battery covers” and select the one suitable for your product.
- When ordering a battery cover, please provide JAN code to ensure smooth processing.
- Please note that using incompatible battery cover may affect the product’s performance and safety.
- We recommend keeping this manual.
